Overview

This guide is intended for users who wish to manually configure PokerTracker3 to import hand histories from sites on the Boss Media/IPN network in the event that hand histories are not automatically configured for import.

For information on installing and setting up PokerTracker3, see the *PokerTracker3 Quick Start Guide*.

Auto Importing Hand Histories

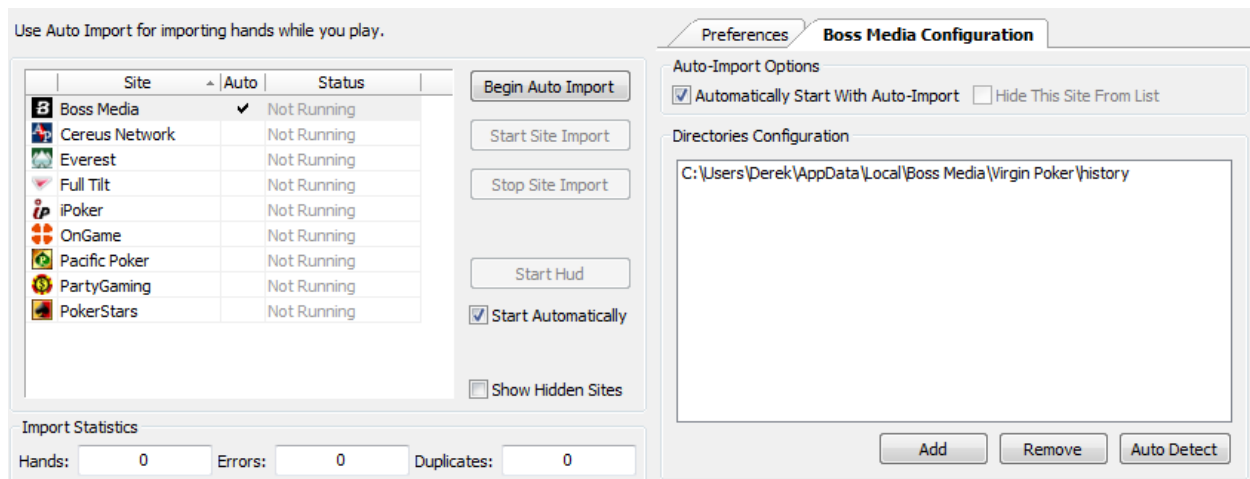

Your Boss Media poker software will automatically save hand history files as you play, and PokerTracker 3 should auto-detect the folder they are written to.

On the **Auto Import** tab, select **Boss Network** from the site list on the left hand side, then click the **Boss Media Configuration** tab to the right.

Tip: If you do not see Boss Media listed, check the **Show Hidden Sites** option.

If you do not see your hand history folder listed, click the **Auto Detect** button. This should add the correct folder to the **Directories Configuration**. If it doesn't, you can manually select the folder that they are being written to using the **Add** button. This will probably be something like the path shown in the following image.

If you play at more than one Boss Media site, make sure that all of your sites' hand history folders are listed here.

If you wish PokerTracker 3 to start importing hands from Boss Media whenever you start auto importing, enable the **Automatically Start With Auto-Import** option.

Manually Importing Hand Histories

If you have a lot of hand histories you wish to import you should use the **Manual Import** tab instead of Auto Import. You can use the buttons to either **Import From File(s)** or **Import From Directory**.

PokerTracker™ Help & Support

There are numerous help documents and tutorials to assist you in configuring and using PokerTracker. If you cannot find the answer you need via these resources, please search the forums. If your question or problem is not addressed you should then contact support using the PokerTracker Support system.
