Introduction

The formulas listed here are just descriptive – if you want to see how the statistic is actually calculated you can do this using the Custom Statistics window.

Configure -> Configure Stats

The stats are separated into sections depending on what they relate to.

- **Holdem Cash|Tournament Hand** stats relate to a specific hand, and can be used in reports which list individual hands, such as the “Hands -> Known Starting Hands Detail” report.
- **Holdem Cash|Tournament Player Statistics** stats relate to a specific player and are built from all the hands that player has played. They can be used in the HUD and reports about a player’s overall hands, such as the “General -> Player Statistics” report or “Hands -> Known Starting Hands Summary”.
- **Holdem Cash|Tournament Session** stats relate to a specific session for a player, and can be used in reports listing individual sessions, such as the “Sessions -> Sessions” report.
- **Holdem Cash|Tournament Sessions** stats relate to a player’s overall session totals, and can be used in summary type reports, such as the “General -> Player Summary” report.

The stats you can use on the HUD are all in the ‘Holdem Cash|Tournament Player Statistics’ sections, and these are probably the stats you’ll use the most.

To see how a specific stat is built (for example: ‘3Bet Preflop’), choose the appropriate section (‘Holdem Cash Player Statistics’) on the ‘Sections’ tab, then select the ‘Statistics’ tab.

Find the statistic in the list on the left hand side and click to select it.

You will now see the stat on the right hand side. The ‘Value Expression’ field shows the calculation being used.

For ‘3Bet Preflop’ the expression is “(cnt_p_3bet / cnt_p_3bet_opp) * 100”.

This means that the expression is built from the *Column* ‘cnt_p_3bet’ divided by the *Column* ‘cnt_p_3bet_opp’, multiplied by 100 to get a percentage.

To see how the columns are built, click the ‘Columns’ tab, find one of them in the list on the left and click to select it. You will then see the column on the right hand side. The ‘Expression’ field shows the calculation being used.

For ‘cnt_p_3bet’ the expression is “sum(if[holdem_hand_player_statistics.flg_p_3bet, 1, 0])”.

This means that the expression is built using the database field

“holdem_hand_player_statistics.flg_p_3bet”, which is a boolean ‘flag’ (flg_) field and will be true if the player 3-bet a specific hand preflop (p_).

To find out how many times in total the player 3-bet preflop across all hands, we count how many times that database field is true by iterating each hand.

- The “if” statement checks the database field and returns 1 if it’s true and 0 if it’s false.
if [expression, value-if-true, value-if-false]
- The “sum” statement adds up the value returned by the “if” statement for each hand, so it adds 1 for true and 0 for false, effectively counting the times it’s true.
sum(if[exp,1,0])

The ‘cnt_p_3bet_opp’ is built in exactly the same way but using the database field “holdem_hand_player_statistics.flg_p_3bet_opp” which shows opportunities (_opp) to 3-bet. The full expression is “sum(if[holdem_hand_player_statistics.flg_p_3bet_opp, 1, 0])”.

All statistics are built from this basic pattern, so you can find out how every stat in PT3 is built in this way.

Statistical Reference Guide

\$/100 *(Money Won per 100 Hands)*

Description: The average amount of money won or lost per 100 hands.

Formula: $[\text{Total Amount Won} / (\text{Total Hands Played} / 100)]$

\$/Hand *(Money Won per Hand)*

Description: The average amount of money won or lost per hand.

Formula: $(\text{Total Amount Won} / \text{Total Hands Played})$

3Bet P/F/T/R *(Three Bet on the Preflop/Flop/Turn/River)*

Description: The percentage of times the player made a [3-bet](#) (re-raised a raiser) preflop or on the flop, turn or river when they had the opportunity. This includes all 3-bets, not just those where this player made the original bet.

Formula: $(\text{Total Times 3Bet on PF|F|T|R}) / \text{Total 3Bet Opportunities on PF|F|T|R}) * 100$

3Bet Total *(Total Three Bets)*

Description: The percentage of times the player [3-bet](#) (re-raised a raiser) when they had the opportunity. This includes all 3-bets, not just those where this player made the original bet.

Formula: $(\text{Total Times 3Bet} / \text{Total 3Bet Opportunities}) * 100$

4Bet P/F/T/R Total *(Four Bet on the Preflop/Flop/Turn/River or Total)*

Description: The percentage of times the player [4-bet](#) (raised a 3-Bet or higher) when they had the opportunity. This includes all 4-bets, 5-bets, and higher, regardless of any previous action this player did or didn't make.

Formula: $(\text{Total Times 4Bet PF|F|T|R|Total} / \text{Total 4Bet Opportunities PF|F|T|R|Total}) * 100$

AF See [Total AF](#) or [Preflop/Flop/Turn/River AF](#)

AFq see [Total AFq](#) or [Preflop/Flop/Turn/River AFq](#)

Amount Blind *(Amount of Blinds Paid)*

Description: The total amount of money or chips the player has paid in blinds.

Formula: Total amount paid in blinds

Amount Won

Description: The total net amount of money or chips won or lost, formatted as a currency and colored to reflect positive or negative values.

Formula: Total amount won

Att To Steal *(Attempted to Steal)*

Description: The percentage of times the player made a [steal raise](#) (attempted to steal the blinds) when they had the opportunity; i.e. raised when folded to in the cutoff, button, or small blind.

Formula: $(\text{Total Steal Attempts} / \text{Total Steal Opportunities}) * 100$

Att To Steal & Fold *(Attempted to Steal then Folded)*

Description: The percentage of times the player folded at any point in the hand after making a [steal raise](#).

Formula: $(\text{Total times folded hand after making steal raise} / \text{total times made steal raise}) * 100$

BB Faced Steal *see [SB/BB Faced Steal](#)*

BB Steal Def W SD *see [SB/BB Steal Def W SD](#)*

BB Steal Def W w/o SD *see [SB/BB Steal Def W w/o SD](#)*

BB Steal Def WTSD *see [SB/BB Steal Def WTSD](#)*

BB/100 *(Big Bets per 100 Hands)*

Description: The average amount of big bets ([BB](#)) won or lost per 100 hands. A Big Bet is twice the size of the big blind.

Formula: $\text{Total BB Won} / (\text{Total Hands Played} / 100)$

BB/Hand *(Big Bets per Hand)*

Description: The average amount of big bets ([BB](#)) won or lost per hand. . A Big Bet is twice the size of the big blind.

Formula: $(\text{Total BB Won} / \text{Total Hands Played})$

Bet Flop/Turn/River Total

Description: The percentage of times the player bet on a street (or in total) when they had the opportunity.

Formula: $(\text{Total Times Bet F|T|R|Total} / \text{Total Times Bet F|T|R|Total} + \text{Total Times Checked F|T|R|Total}) * 100$

Blind *(Times posted blind)*

Description: The number of times the player posted a big, small or dead blind.

Formula: Total times posted blind

Blinds *(Tournament blinds)*

Description: The blind level the hands were played at. If this stat is added to a report it will break the report into a line for each different blind level.

This is a tournament only stat.

Formula: `lookup_from_id(id_blinds, 'blindssort')`

Buddy

Description: Indicates whether the player has been marked as a 'buddy'. This stat is shown with the 'buddy' icon. You mark a player as buddy on the Texas Holdem -> General tab, or in TableTracker.

Call 3Bet see [Call \[PF/F/T/R\] 3Bet](#)

Call 4Bet see [Call \[PF/F/T/R\] 4Bet](#)

Call F 3Bet see [Call \[PF/F/T/R\] 3Bet](#)

Call F 4Bet see [Call \[PF/F/T/R\] 4Bet](#)

Call F/T/R Bet *(Called Flop/Turn/River Bet)*

Description: The percentage of times the player called when facing a bet on the flop.

Formula: $(\text{total times called when facing F|T|R bet} / \text{total times faced F|T|R bet}) * 100$

Call F CBet *(Called Flop Continuation Bet)*

Description: The percentage of times the player called a flop [continuation bet](#) when they had the opportunity.

Formula: $(\text{Total Times Called Flop CBet} / \text{Total Times Faced Flop CBet}) * 100$

See also: [Call T/R CBet](#)

Call F/T/R Raise *(Call Flop/Turn/River Raise)*

Description: The percentage of hands where the player called a raise on the flop, turn or river when they had the opportunity.

Formula: $(\text{Total hands called raise F|T|R} / \text{total hands with opportunity to call raise F|T|R}) * 100$

Call [PF/F/T/R] 3Bet *(Called three bet total, or on the Preflop/Flop/Turn/River)*

Description: The percentage of hands where the player called a [3-bet](#) in total, or preflop or on the flop, turn or river when they had the opportunity.

Formula: $(\text{Total Hands Player Called a 3Bet PF|F|T|R|Total} / \text{Total Hands Faced a 3Bet PF|F|T|R|Total}) * 100$

Call [PF/F/T/R] 4Bet *(Called four bet total, or on the Preflop/Flop/Turn/River)*

Description: The percentage of hands where the player called a [4-bet](#) in total, or preflop or on the flop, turn, or river when they had the opportunity. 4-bets include 5-bets, 6-bets, and higher.

Formula: $(\text{Total Times Player Called a 4Bet PF|F|T|R|Total} / \text{Total Times Faced a 4Bet PF|F|T|R|Total}) * 100$

Called PFR *(Called Pre-Flop Raise)*

Description: The percentage of hands where the player called a preflop raise when they had the opportunity. This counts all hands where the player faced a preflop raise regardless of any previous or subsequent actions in that hand.

Formula: $(\text{Total Hands Called Pre-Flop Raise} / \text{Total Hands Faced Pre-Flop Raise}) * 100$

Call R 3Bet see [Call \[PF/F/T/R\] 3Bet](#)

Call R 4Bet see [Call \[PF/F/T/R\] 4Bet](#)

Call R Bet see [Call F/T/R Bet](#)

Call R CBet see [Call T/R CBet](#)

Call R Donk Bet see [Call T/R Donk Bet](#)

Call R Float Bet see [Call T/R Float Bet](#)

Call R Raise see [Call F/T/R Raise \(Call Flop/Turn/River Raise\)](#)

Call T 3Bet see [Call \(PF/F/T/R\) 3Bet](#)

Call T 4Bet see [Call \[PF/F/T/R\] 4Bet](#)

Call T Bet *see [Call F/T/R Bet](#)*

Call T/R CBet *(Called Turn/River Continuation Bet)*

Description: The percentage of times the player called a turn or river [continuation bet](#) when they had the opportunity.

Formula: (Total Times Called Turn | River CBet / Total Times Faced Turn | River CBet) * 100

See also: [Call F CBet](#)

Call T/R Donk Bet *(Call Turn/River Donk Bet)*

Description: The percentage of times the player called an opponent's [Donk Bet](#) on the Turn or River. This counts all donk bets, not just those when this player is the previous aggressor.

Formula: (Total times called donk bet / total times faced donk bet) * 100

Call T/R Float Bet *(Call Turn/River Float Bet)*

Description: The percentage of times the player called an opponent's [Float Bet](#) on the Turn or River. This counts all float bets, not just those when this player is the previous aggressor.

Formula: (total times called float bet / total times faced float bet) * 100

Call T Raise *see [Call F/T/R Raise](#)*

CBet Flop *(Continuation Bet Flop)*

Description: The percentage of times the player followed their preflop raise by betting the flop when they had the opportunity. [Continuation Bet](#).

Formula: (Total Times Continuation Bet Flop / Total Continuation Bet Flop Opportunities) * 100

CBet Turn *see [CBet Turn/River](#)*

CBet Turn/River *(Continuation Bet Turn/River)*

Description: The percentage of times the player followed their flop [continuation bet](#) by betting the turn (and bet again on the river) when they had the opportunity. You can only make a continuation bet if you made a continuation bet on all previous streets.

Formula: (Total Times Continuation Bet Turn / Total Continuation Turn Opportunities) * 100

CCPF *(Cold Called Pre-Flop)*

Description: The percentage of times the player [cold called](#) preflop when they had the opportunity. A cold call is when the player calls a preflop raise when they haven't yet got any money in the pot, including blinds.

Formula: $(\text{Total Times Cold Called Pre-Flop} / \text{Cold Call Opportunities}) * 100$

Check Raise *(Flop/Turn/River)*

Description: The percentage of times the player [check raised](#) the Flop, Turn, or River) when they had the opportunity.

Formula: $(\text{Total Times Check Raised F|T|R} / (\text{Total Times Check Raised F|T|R} + \text{Total Times Check Folded F|T|R} + \text{Total Times Check Called F|T|R})) * 100$

Check Raise Total *(Check Raise Total)*

Description: The percentage of times the player [check raised](#) across all streets when they had the opportunity.

Formula: $(\text{Total Times Check Raised} / (\text{Total Times Check Raised} + \text{Total Times Check Folded} + \text{Total Times Check Called})) * 100$

Donk (Turn/River) *(Donk Bet Turn/River)*

Description: The percentage of times the player made a [donk bet](#) on the turn or river when they had the opportunity.

Formula: $(\text{Total times Donk Bet} / \text{Total opportunities to Donk Bet}) * 100$

Final Hand

Description: The strength of the final hand the player would have had using all the dealt board cards. This is shown as text such as "High Card", "Two Pair", "Flush", etc. If this stat is added to a report it will break the report into a line for each final hand type. This stat can't be used on the HUD.

Formula: `Lookup_hand_ranks.group_name`

Float (T/R) *(Float Bet Turn/River)*

Description: The percentage of times the player '[floated](#)' the turn or river when they had the opportunity.

Formula: $(\text{Total times float bet T|R} / \text{Total opportunities to float bet T|R}) * 100$

Flop AF *see [Preflop/Flop/Turn/River AF](#)*

Flop AFq *see [Preflop/Flop/Turn/River AFq](#)*

Fold BB to SB Steal *(Fold Big Blind to Small Blind Steal Raise)*

Description: The percentage of times the player folded his Big Blind ([BB](#)) when facing a [steal raise](#) by the Small Blind ([SB](#)).

Formula: $(\text{Total times BB folded to a SB steal raise} / \text{Total times BB faced SB steal raise}) * 100$

Fold BB to Steal *(Folded Big Blind to Steal Raise)*

Description: The percentage of times the player folded their big blind ([BB](#)) when facing a [steal raise](#).

Formula: $(\text{Total Times Folded BB To Steal} / \text{Total BB Steal Defense Opportunities}) * 100$

See also: [Fold SB to Steal](#) and [Fold BB to SB Steal](#)

Fold Flop/Turn/River

Description: The percentage of hands the player folded on the flop/turn/river when they saw that street.

Formula: $(\text{Total times folded on the F|T|R} / \text{Total times saw F|T|R}) * 100$

Fold River *see* [Fold Flop/Turn/River](#)

Fold SB to Steal *(Folded Small Blind to Steal Raise)*

Description: The percentage of times the player folded the small blind ([SB](#)) when facing a [steal raise](#).

Formula: $(\text{Total Times Folded SB To Steal} / \text{Total SB Steal Defense Opportunities}) * 100$

See also: [Fold BB to Steal](#)

Fold Steal to Blind Reraise

Description: The percentage of times the player folded after making a [steal raise](#) when one of the blinds re-raised and everyone else folded.

Formula: $(\text{Total times steal raiser folded when facing a Reraise from a blind} / \text{Total times steal raiser faced a Reraise from a blind}) * 100$

Fold to [PF/F/T/R] 3Bet *(Folded to Pre-Flop/Flop/Turn/River Three Bet)*

Description: The percentage of times the player folded when facing a [three bet](#) (re-raise) in total, or preflop or on the flop, turn or river. This includes all folds when facing a 3-bet, regardless of any previous action the player has or hasn't made.

Formula: $[\text{Total Times Player Folded to 3Bet on (PF/F/T/R)} / \text{Total Times Faced 3Bet on (PF/F/T/R)}] * 100$

Fold to [PF/F/T/R] 4Bet (*Folded to Pre-Flop/Flop/Turn/River Four Bet*)

Description: The percentage of times where the player folded when facing a [4-bet](#) (or 5-bet or higher) in total, or preflop or on the flop, turn or river. This includes all folds when facing a 4-bet or higher, regardless of any previous action the player has or hasn't made, but folds and opportunities are only counted once per street. If the player raises a 4-bet and then folds to a 6-bet, this stat is 100%.

Formula: $(\text{Total times player folded to a 4-bet [PF|F|T|R]} / \text{Total times player faced a 4-bet [PF|F|T|R]}) * 100$

Fold to (F/T/R) Bet (*Folded Flop/Turn/River to a Bet*)

Description: The percentage of times the player folded when facing a bet on the flop, turn or river.

Formula: $(\text{Total Times Player Folded to a F|T|R Bet} / \text{Total Times Faced F|T|R Bet}) * 100$

Fold to F/T/R CBet (*Folded to Flop/Turn/River Continuation Bet*)

Description: The percentage of times the player folded to a [continuation bet](#) on the flop, turn, or river.

Formula: $(\text{Total Times Folded to F|T|R CBet} / \text{Total Times Called F|T|R CBet} + \text{Total Times Folded to F|T|R CBet} + \text{Total Times Raised F|T|R CBet}) * 100$

Fold to (F/T/R) Raise (*Folded to a Flop/Turn/River Raise*)

Description: The percentage of hands where the player folded when facing a raise on the flop, turn or river. This includes all folds when facing any raise regardless of any previous action the player has or hasn't made. Each street counts as a single opportunity regardless of how many raises the player faced – e.g. if you 3-bet a raise but fold to a 4-bet then this stat will be 100%.

Formula: $(\text{Total Times Player Folded to a F|T|R Raise} / \text{Total Times Faced F|T|R Raise}) * 100$

Fold to PF 3Bet see [Fold to \[PF/F/T/R\] 3Bet](#)

Fold to PF 4Bet see [Fold to \[PF/F/T/R\] 4Bet](#)

Fold to R 3Bet see [Fold to \[PF/F/T/R\] 3Bet](#)

Fold to R 4Bet see [Fold to \[PF/F/T/R\] 4Bet](#)

Fold to R Bet see [Fold to \(F/T/R\) Bet](#)

Fold to R CBet see [Fold to F/T/R CBet](#)

Fold to R Donk Bet see [Fold to T/R Donk Bet](#)

Fold to R Float Bet see [Fold to T/R Float Bet](#)

Fold to R Raise see [Fold to \(F/T/R\) Raise](#)

Fold to T 3Bet see [Fold to \[PF/F/T/R\] 3Bet](#)

Fold to T 4Bet see [Fold to \[PF/F/T/R\] 4Bet](#)

Fold to T Bet see [Fold to \(F/T/R\) Bet](#)

Fold to T CBet see [Fold to F/T/R CBet](#)

Fold to T/R Donk Bet (*Fold to Turn/River Donk Bet*)

Description: The percentage of times the player folded when facing a turn or river [donk bet](#).

Formula: $(\text{Total times folded to T|R donk bet} / \text{Total times faced T|R donk bet}) * 100$

Fold to T/R Float Bet (*Fold to Turn/River Float Bet*)

Description: The percentage of times the player folded when facing a turn or river [float bet](#).

Formula: $(\text{Total times folded to a T|R float bet} / \text{Total times faced T|R float bet}) * 100$

Fold to T Raise see [Fold to \(F/T/R\) Raise](#)

Fold Turn see [Fold Flop/Turn/River](#)

Hands

Description: The total number of hands the player has played.

Formula: Total hands played

Hands Won

Description: The total number of hands the player has won. This includes split pots.

Formula: Total hands won

HoleCards

Description: The type of hole cards you held. This is listed as, for example, AA, KQs, T8o. If this stat is added to a report it will break the report into a line for each pair of hole cards. This stat can't be used on the HUD.

Formula: `lookup_from_id(id_holecard, 'cardpair')`

Limit *(Blind Limit and table size)*

Description: The cash limit the hands were played at and the full table size. If this stat is added to a report it will break the report into a line for each different blind limit and full table size combination. This is a cash-only stat.

Formula: `lookup_from_id(id_limit, 'limitsort')`

LWPC *(Limped with Previous Callers)*

Description: The percentage of times the player limped after at least one previous player had already limped.

Formula: $(\text{Total Times Limped with Previous Callers} / \text{Total times limped with previous callers} + \text{total times raised with previous callers} + \text{total times folded with previous callers}) * 100$

MGR *(Monthly Gross Revenue)*

Description: The total amount of credited rake paid in each hand divided by the number of players in the hand.

Formula: `SUM for all hands of (Rake Paid for Hand / Total Number of Players Dealt into the Hand)`

PFR *(Pre-Flop Raise)*

Description: The percentage of hands where the player made any raise pre-flop.

Formula: $(\text{Total Hands Raised Pre-Flop} / \text{Total Hands Played}) * 100$

Player

Description: The player's name.

Player Icon

Description: The auto-rate icon associated with the player.

Formula: `lookup_from_id(val_icon, 'icondesc')`

Position *(Position off the button)*

Description: The number of seats away from the button that the player is. The button is position 0, cutoff is 1, hijack is 2, etc. The Big Blind is always position 8 and Small Blind is always position 9 regardless of table size.

If this stat is added to a report it will break the report into a line for each position. This stat can't be used on the HUD.

Preflop/Flop/Turn/River AF *(Preflop/Flop/Turn/River Aggression Factor)*

Description: A measure of how aggressive or passive the player is on a particular street.

Formula: $(\text{Times bet PF|F|T|R} + \text{times raised PF|F|T|R}) / (\text{Times called PF|F|T|R})$

Preflop/Flop/Turn/River AFq *(Preflop/Flop/Turn/River Aggression Frequency)*

Description: The measure of how frequently the player made aggressive actions preflop or on the flop, turn or river.

Formula: $[(\text{Times Bet PF|F|T|R} + \text{Times Raised PF|F|T|R}) / (\text{Times Bet PF|F|T|R} + \text{Times Raised PF|F|T|R} + \text{Times Called PF|F|T|R} + \text{Times Folded PF|F|T|R})] * 100$

Raise 3Bet *(Raise Three Bet)*

Description: The percentage of times the player raised when facing a [3-bet](#) across all streets. This includes all times when facing 3-bets regardless of any previous action the player has or hasn't made, not just those when the player made an original bet or raise.

Formula: $(\text{times raised a 3-bet preflop+flop+turn+river} / \text{times faced a 3-bet preflop+flop+turn+river}) * 100$

See also: [Raise PF/F/T/R 3Bet](#)

Raise 4Bet *(Raise Four Bet)*

Description: The percentage of times the player raised when facing a [4-bet](#), 5-bet, or higher across all streets. This includes all times when facing 4-bets regardless of any previous action the player has or hasn't made, not just those when the player made an original bet or raise.

Formula: $(\text{times raised a 4-bet preflop+flop+turn+river} / \text{times faced a 4-bet preflop+flop+turn+river}) * 100$

See also: [Raise PF/F/T/R 4Bet](#)

Raise BB Steal Att *(Raise Steal Attempt From Big Blind)*

Description: The percentage of times the player raised from the Big Blind when facing a [steal raise](#).
Formula: $(\text{total times raised from BB when facing a steal} / \text{total times faced a steal in the BB}) * 100$
See Also: [Raise SB Steal Att](#)

Raise F 3Bet see [Raise PF/F/T/R 3Bet](#)

Raise F 4Bet see [Raise PF/F/T/R 4Bet](#)

Raise F/T/R Bet *(Raise Flop/Turn/River Bet)*

Description: The percentage of times the player raised a bet on the flop, turn or river when they had the opportunity.
Formula: $(\text{total times raised F|T|R bet} / \text{total times faced F|T|R bet}) * 100$

Raise F CBet *(Raised Flop Continuation Bet)*

Description: The percentage of times the player raised an opponent's flop [continuation bet](#).
Formula: $(\text{Total Times Raised Flop CBet} / \text{Total Times Faced Flop CBet}) * 100$
See also: [Raise T/R CBet](#)

Raise Flop/Turn/River Total

Description: The percentage of the player's flop, turn, river, or total actions which were raises. This includes all raises, 3-bets, 4-bets, etc.
Formula: $(\text{total number of raises} / (\text{total number of folds} + \text{calls} + \text{raises})) * 100$

Raise PF/F/T/R 3Bet *(Raise Three Bet Preflop/Flop/Turn/River)*

Description: The percentage of times the player raised when facing a [3-bet](#) preflop or on the flop, turn or river. This includes all times when facing 3 bets regardless of any previous action the player has or hasn't made, not just those when the player made an original bet or raise.
Formula: $(\text{times raised a 3-bet P|F|T|R} / \text{times faced a 3-bet P|F|T|R}) * 100$
See Also: [Raise 3Bet](#)

Raise PF/F/T/R 4Bet *(Raise Three Bet Preflop/Flop/Turn/River)*

Description: The percentage of times the player raised when facing a [4-bet](#), 5-bet, or higher preflop or on the flop, turn or river. This includes all times when facing 4-bets regardless of any previous action the player has or hasn't made, not just those when the player made an original bet or raise.

Formula: $(\text{times raised a 4-bet P|F|T|R} / \text{times faced a 4-bet P|F|T|R}) * 100$

See Also: [Raise 4Bet](#)

Raise R 3Bet see [Raise PF/F/T/R 3Bet](#)

Raise R 4Bet see [Raise PF/F/T/R 4Bet](#)

Raise R Bet see [Raise F/T/R Bet](#)

Raise R CBet see [Raise \(Turn/River\) CBet](#)

Raise R Donk Bet see [Raise T/R Donk Bet](#)

Raise R Float Bet see [Raise T/R Float Bet](#)

Raise River see [Raise Flop/Turn/River Total](#)

Raise SB Steal Att *(Raise Steal Attempt From Small Blind)*

Description: The percentage of times the player raised from the Small Blind when facing a [steal raise](#).

Formula: $(\text{total times raised from SB when facing a steal} / \text{total times faced a steal in the SB}) * 100$

See Also: [Raise BB Steal Att](#)

Raise T 3Bet see [Raise PF/F/T/R 3Bet](#)

Raise T 4Bet see [Raise PF/F/T/R 4Bet](#)

Raise T Bet see [Raise F/T/R Bet](#)

Raise T/R CBet *(Raised Turn/River Continuation Bet)*

Description: The percentage of times a player raised an opponent's turn or river [continuation bet](#).

Formula: $(\text{Total Times Raised Turn|River CBet} / \text{Total Times Faced Turn|River CBet}) * 100$

See also: [Raise F CBet](#)

Raise T/R Donk Bet *(Raise Turn/River Donk Bet)*

Description: The percentage of times the player raised an opponent's [Donk Bet](#) on the Turn or River. This counts all donk bets, not just those when this player is the previous aggressor.

Formula: $(\text{Total times raised donk bet} / \text{total times faced donk bet}) * 100$

Raise T/R Float Bet *(Raise Turn/River Float Bet)*

Description: The percentage of times the player raised an opponent's [Float Bet](#) on the Turn or River. This counts all float bets, not just those when this player is the previous aggressor.

Formula: $(\text{Total times raised float bet} / \text{total times faced float bet}) * 100$

Raise Total see [Raise Flop/Turn/River Total](#)

Raise Turn see [Raise Flop/Turn/River Total](#)

Rake *(Rake Paid)*

Description: The actual amount of rake paid by the player.

Formula: $(\text{Total Rake paid by the Player})$

RFI *(Raised First In)*

Description: The percentage of times the player raised when they had the opportunity to open the pot.

Formula: $(\text{Total Times Raised First In} / \text{Total Hands Played}) * 100$

River AF see [Preflop/Flop/Turn/River AF](#)

River AFq see [Preflop/Flop/Turn/River AFq](#)

Saw Flop/Turn/River

Description: The total number of times the player saw the flop, turn or river.

Saw Flop %

Description: The percentage of times the player saw the flop out of all hands.

Formula: $(\text{total times saw F|T|R} / \text{total hands played}) * 100$

SB/BB Faced Steal *(Small/Big Blind Faced Steal Raise)*

Description: The number of times the player faced a [steal raise](#) when they were in the small or big blind.

Formula: Total times faced steal raise in SB|BB

SB/BB Steal Def W SD *(Small/Big Blind Steal Defense Won at ShowDown)*

Description: The percentage of times the player won the hand when they faced a [steal raise](#) in the small or big blind and the hand went to a showdown.

Formula: $(\text{total times faced steal in SB|BB and won at showdown} / \text{total times faced steal in SB|BB and went to showdown}) * 100$

SB/BB Steal Def W w/o SD *(Small/Big Blind Steal Defense Won Without ShowDown)*

Description: The percentage of times the player won the hand when they faced a [steal raise](#) in the small or big blind and it didn't go to a showdown.

Formula: $(\text{total times faced steal in SB|BB and won without showdown} / \text{total times faced steal in SB|BB and didn't go to showdown}) * 100$

SB/BB Steal Def WTSD *(Small/Big Blind Steal Defense Went To ShowDown)*

Description: The percentage of times that the hand went to a showdown when the player faced a [steal raise](#) in the small or big blind.

Formula: $(\text{total times hand went to showdown when facing steal raise in SB|BB} / \text{total times faced steal raise in SB|BB}) * 100$

Site *(Poker Site)*

Description: The poker site at which the player played the hands. If this stat is added to a report it will break the report into a line for each site. This stat can't be used on the HUD.

Formula: `lookup_from_id(id_site , 'siteabbr')`

Site Icon *(Poker Site Icon)*

Description: The icon for the site at which the player played the hands. If this stat is added to a report it will break the report into a line for each site. This stat can't be used on the HUD.

Steal Success *(Blind Steal Success)*

Description: The percentage of times the player won the pot immediately when making a [steal raise](#). i.e. everyone else folded immediately when the player made an open raise from the cutoff, button or small blind.

Formula: $(\text{total times steal raise won immediately} / \text{total steal raises}) * 100$

Steal W SD *(Blind Steal Won at ShowDown)*

Description: The percentage of times the player won the pot after making a [steal raise](#) when the hand went to showdown.

Formula: $(\text{total times won at showdown after steal raise} / \text{total times went to showdown after steal raise}) * 100$

Steal W w/o SD *(Blind Steal Won without ShowDown)*

Description: The percentage of times the player won the pot after making a [steal raise](#) when the hand didn't go to showdown.

Formula: $(\text{total times won without showdown after steal raise} / \text{total times didn't go to showdown after steal raise}) * 100$

Steal WTSD *(Blind Steal Went To ShowDown)*

Description: The percentage of times the player went to showdown after making a [steal raise](#).

Formula: $(\text{total times went to showdown after steal raise} / \text{total steal raises}) * 100$

Times

Description: The number of hands played. This is just another name for the stat "[Hands](#)" and is used in some reports.

Formula: Total hands played.

Total AF *(Total Aggression Factor)*

Description: A measure of how aggressive or passive the player is across all post-flop streets.

Formula: $(\text{Total Times Bet} + \text{Total Times Raised}) / (\text{Total Times Called})$

See also: [Preflop/Flop/Turn/River AF](#) and [Total AFq](#)

Total AFq *(Total Aggression Frequency)*

Description: The measure of how frequently a player is aggressive across all post-flop streets.

Formula: $[(\text{Total Times Bet} + \text{Total Times Raised}) / (\text{Total Times Bet} + \text{Total Times Raised} + \text{Total Times Called} + \text{Total Times Folded})] * 100$

See Also: [Preflop/Flop/Turn/River AFq](#) and [Total AF](#)

Turn AF *see [Preflop/Flop/Turn/River AF](#) and [Total AF](#)*

Turn AFq *see [Preflop/Flop/Turn/River AFq](#) and [Total AFq](#)*

VP\$IP *(Voluntarily Put Money in the Pot)*

Description: The percentage of hands the player voluntarily put money into the pot preflop out of all hands. This does not include posting any blind money.

Formula: (Total Times Voluntarily Put Money in the Pot / Total Hands Played) * 100

VP\$IP SB *(Voluntarily Put Money in the Pot from the Small Blind)*

Description: The percentage of times the player voluntarily put money into the pot preflop when they were the small blind. This does not include small blind money; it only counts hands where further money was bet preflop.

Formula: (total times voluntarily put money in the pot after posting the small blind / total hands played as the small blind) * 100

W\$SD *(Won Money at Showdown)*

Description: The percentage of times the player won money when going to showdown, including split pots where the player won less than they bet.

Formula: (Total Times Won Money at Showdown / Total Times Went to Showdown) * 100

W\$WSF *(Won Money When Saw the Flop)*

Description: The percentage of times the player won money after seeing the flop.

Formula: (Total times Won Money after seeing the Flop / Total Times Saw The Flop) * 100

Win % *(Win Percentage)*

Description: The percentage of hands played which the player won.

Formula: (total hands won / total hands played) * 100

Without Blind *(Money Won Without Blind Money)*

Description: The total amount of money the player won, with the blinds they paid removed.

Formula: total amount won + total amount paid in blinds

WSDWRT/R *(Won Money at Showdown When Raised the Turn/River)*

Description: The percentage of times the player won money at showdown after raising the turn or river.

Formula: [Total Times Won Money at Showdown after Turn|River Raise / Total Times Went to Showdown after Turn|River Raise] * 100

WTSD *(Went to Showdown)*

Description: The percentage of times the player went to showdown after seeing the flop.

Formula: $(\text{Total Times Went to Showdown} / \text{Total Times Saw The Flop}) * 100$

Glossary

3-Bet	A raise of a raise (or re-raise). The betting order is Bet, Raise, 3-bet.
4-Bet	Any raise above a 3-bet. This includes all 4 th , 5 th , 6 th , etc. bets.
BB – 1)	When talking about bet sizes or win rates, BB refers to Big Bets. A Big Bet is the size of a holdem limit turn or river bet and is normally twice the size of the big blind.
BB - 2)	When talking about position, BB refers to the Big Blind position.
Check Raise	Checking initially but then raising after an opponent bets behind you.
Cold Call	A cold call is calling a preflop raise when you don't already have any money or chips invested in the pot, including blinds. You can never cold call from the blinds since you already have money or chips in the pot.
Continuation Bet (Also 'CBet')	A continuation bet is opening the betting on a street when you made the last bet or raise on the previous street. Normally this means being the preflop raiser and opening the betting on the flop, but is extended to the turn and river while you retain the initiative. You can only make a continuation bet on the turn if you made one on the flop; and on the river if you made one on the turn.
Donk Bet	A donk bet is betting out before the aggressor on the previous street has chance to bet. E.g. you check/call the flop, and then bet out on the turn.
Float Bet	A float bet is calling behind on one street and then betting if checked to on the next. E.g. you call behind on the turn, and then your opponent checks the river and you bet.
SB	When talking about position, SB refers to the Small Blind position.
Steal Defense	You are in a steal defense situation if you are in the small or big blind and facing a steal raise when no-one else has called or raised. For instance, if the button open raises the small blind is facing a steal, but if they call then the big blind is not facing a steal.
Steal Raise	A steal raise is an open raise by the cutoff, button, or small blind. i.e. there has been no action and the cutoff, button or small blind opens the pot with a raise.
