Choose Your Currency in PokerTracker 4

PokerTracker 4 is shaping up to be one of the hottest selling pieces of software of all-time. Included in it is the ability to break down stats using 29 different currencies. After all, you shouldn't have to worry about currency conversion rates when choosing which table to play at or while tracking your win rate. This is why PokerTracker 4 has introduced the concepts of Game Currency and My Currency to simplify the process. Read more.

Holdem Manager 2 Adds Tilt Breaker

The developers behind Holdem Manager 2 recently released a key update to improve the marquee poker software even more. Effective immediately, Holdem Manager 2 customers will be able to utilize HM2 in five languages: German, Russian, Spanish, French, and English. Portuguese and Italian will soon be included too. There is also a Tilt Breaker widget included in the new update.

SOFTWARE SPOTLIGHT

This month, we'll focus on HH Dealer, a popular data mining site. HH Dealer now has coverage of nearly double the number of hands per day on PokerStars, the world's largest online poker site.

In addition, data mining for the Entraction Network, which encompasses sites like 24hPoker and NoiQ Poker, is now available. PokerScout ranks the Entraction Network as one of the top 10 largest in the world and the ability to receive hand histories from it will provide a huge advantage.

Learn more about HH Dealer.

PokerTableStats Interview with PokerSoftware

By David Huber

PokerSoftware is constantly on the lookout for new programs that will help online poker players improve their bottom lines. One of those programs is PokerTableStats, which provides a real-time HUD and stores user information in a cloud. We recently caught up with PokerTableStats Chief Developer Artur Pietrzyk, who broke down how the program was developed and what its future holds.
